

Bazaar

Quick Start Card

More Information
bzd help
<http://bazaar-vcs.org>

Initialization

New project

```
bzd init myproject
```

Existing project

```
cd myproject  
bzd init  
bzd add .
```

New branch

```
bzd branch mp myproject
```

New checkout

```
bzd checkout mp myproject
```

New "lightweight " checkout

```
bzd checkout --lightweight mp \  
myproject
```

File Manipulation

Add/"version " files

```
bzd add foo.py  
bzd add bar/
```

Remove/"unversion " files

```
bzd remove --keep foo.py
```

Remove and delete files

```
bzd remove --force foo.py
```

Version Control

Commit

```
bzd commit foo.py -m "foo"  
bzd commit -m "the rest"
```

Undo last commit

```
bzd uncommit
```

Revert changes

```
bzd revert
```

Merging

Merge two branches

```
cd myproject  
bzd merge ../myproject-foo  
bzd commit
```

Pull changes from myproject

```
cd myproject-foo  
bzd pull ../myproject
```

Update a checkout

```
bzd update
```

Auto-detect resolved conflicts

```
bzd resolve
```

Specify resolved conflict

```
bzd resolve foo.py
```

Concepts

Branch:

line of development for a project

Working tree:

version controlled directory

Repository:

store for Bazaar revisions

Revision:

version of the source code committed to the repository

Tag:

named revision

Related branches: branches having a common ancestor

Merge: the operation of applying to a branch all the changes introduced by another one

Information

Working tree status

```
bzd status
```

Revision log

```
bzd log  
bzd log foo.py
```

Working tree changes

```
bzd diff
```

foo.py changes

```
bzd diff foo.py
```

foo.py changes between revisions 1 and 3

```
bzd diff -r1..3 foo.py
```

Missing revisions

```
bzd missing
```

Branch information:

```
bzd info
```

Contents of foo.py at revision 3

```
bzd cat -r3 foo.py
```

Supported URL Prefixes

aftp:// Access using active FTP.

bzd:// Fast access using the Bazaar smart server.

bzd+ssh:// Fast access using the Bazaar smart server over SSH.

file:// Access using the standard filesystem (default)

ftp:// Access using passive FTP.

http:// Read-only access of branches exported on the web.

https:// Read-only access of branches exported on the web using SSL.

sftp:// Access using SFTP (most SSH servers provide SFTP).

Publishing

Push revisions

```
bzd push ../myproject-fo1
```

Push revisions remotely

```
bzd push sftp://host/myproject-fo1
```

Email a merge directive

```
bzd send
```

Create a merge directive

```
bzd send -o ../base.patch
```

Export current revision as a directory

```
bzd export ../myproject-dist/
```

Export current revision as an archive

```
bzd export ../myproject-dist.zip
```
